Xiaowen Zheng

My name is Xiaowen. I taking this class because I would like to enhance my skills in design. My major is graphic design, and be a graphic designer is my goal. Taking this class is my beginning of it. In this project, the typefaces I used in the opening page is Ayuthaya, and I used Times New Roman in all the back pages. For the front pages of each project, I chose Noteworthy because it is cute. In addition, my project use the main tone of dark blue which can be image as the sky at night. My purpose is to show a mysterious world, so I also use a Japanese Heian period picture as the background and decorations.

Raster Project

WANDER IN THE DREAM

In the Raster project, the character is my dog. She was my best friend when I were a child, and I miss her so much. I wish she didn't leave me and just go to a fantastic world.

The Vector project is base on my raster project. I keep the theme same, so it's like a ticket to a mysterious world.

Motion Project

Have a nice day!

My idea is to creat a music box, and I try to show the scene when the music box is wound. The rabit will jump around and the flower will fall from the tree. It really challenged me because it's hard to set up the frames for the flowers.
